Professional Summary

Final-year B.Tech Computer Science student (2027) with hands-on experience in React.js, Node.js, Express.js, MongoDB, and REST APIs through full-stack projects. Strong foundation in JavaScript, DSA, OOP, and JWT-based authentication, with 150+ coding problems solved on GeeksforGeeks and LeetCode. Eager to contribute as a Full Stack Developer and grow with production systems.

Education

Raj Kumar Goel Institute of Technology — Ghaziabad, Uttar Pradesh
Bachelor of Technology (Computer Science and Engineering) — *CGPA: 7.77/10 Expected 2027*

Projects

StudyNotion | ***MERN, Redux Toolkit, Tailwind CSS, JWT, Cloudinary, Razorpay, AI Integration***
GitHub Live Demo

- Architected and independently developed a production-style MERN EdTech platform featuring Student, Instructor and Admin dashboards with course management, enrollment and learning workflows.
- Engineered secure RESTful APIs using Express.js, MongoDB and JWT authentication with Role-Based Access Control, OTP-based email verification and bcrypt password hashing.
- Developed **SAARTHI**, an AI-powered personal tutor that assists students with course-related queries, explains concepts conversationally and provides interactive learning support.
- Integrated SAARTHI into the learning workflow to enable students to receive instant AI assistance while studying, reducing dependency on manual instructor support for common doubts.
- Integrated Razorpay payment gateway and Cloudinary for secure payments and scalable media management, and deployed the application on Vercel and Render.

ShopEasy | ***MERN Stack***

GitHub Live Demo

- Developed a full-stack e-commerce platform using the MERN stack with secure JWT-based authentication and authorization.
- Designed and implemented 15+ RESTful API endpoints connecting the React frontend with a MongoDB backend using Express.js and Mongoose.
- Built core e-commerce features including product management, shopping cart, checkout workflow, order placement and protected user routes while validating APIs using Postman.
- Implemented an order tracking system that allows users to monitor order status through different stages from placement to delivery, with status updates managed through the backend.
- Created a responsive user interface with React.js and integrated frontend and backend services to deliver a seamless shopping experience.

Technical Skills

Languages: C, C++, JavaScript, SQL (Basics)
Frontend: HTML, CSS, React.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC
Database: MongoDB, Mongoose
Tools: Git, GitHub, VS Code, Postman
Cloud & APIs: Vercel, Render, Cloudinary, Razorpay, Gemini API
Core Subjects: OOP, DBMS, Operating Systems, Computer Networks

Training & Certifications

- DSA Training Program – GeeksforGeeks (20 Days)
- Artificial Intelligence – Infosys (Sept 2025)
- Oracle AI Foundation Associate (Aug 2025)
- Intro to IT & AWS Cloud – Coursera (Dec 2025)

Achievements

- Solved 150+ coding problems on GeeksforGeeks and LeetCode.
- Regular participant in coding contests organized by the college technical society.
- Debugged real-world programming issues during Error Hunt conducted by Nebula Society.
- Designed and built an RC Car for the Robomania technical event.
